

Environment Noise System

- * All-in-one solution for audio monitoring
- * Supervised Volume control with Supports Interface to traditional PA System
- * Configurable audio alarm level with SMS Alert
- * Interface with Other Sound Level Meter

The ENS-1801 is a universal audio level monitoring, IP-based audio monitoring device and do supporting other Audio level meter applications. It is an ideal solution for bridging audio noise and audio control level in public address system, e.g. in shopping malls, tunnels, Airport, in and between railway stations. It extends and interfaces to Praesideo and non-network based traditional public address systems. IP Base solution with WIFI for easy interfacing and deployment. All audio input can be switched and microphone sensitivity can be adjusted as per location requirement needed.

Technical Specification

Electrical:

Power supply external 12VDC

Ethernet Connector RJ45 10/100Mbps(or Wifi)

RS232/485 9pins sub-D connector
